

City of Nashville

Larry Dunaway, Mayor

August 23, 2023

Michael Young
ADEQ

Mr. Young,

At the time of our last WWTP inspection we were experiencing the overflow of our equalization basin. The overflow was due to unusually high rainfall totals. Since then, we have maintained the required amount of free board in the pond.

The City of Nashville is actively engaged in an I & I control program. As we reduce the I & I issue we will reduce the changes of an overflow.

If you have any questions or need any further information, please give me a call at 870-845-7400 or on my cell at 870-557-1953.

Thank you,

Larry Dunaway
Mayor
Public Works Director
