RE: Unpermitted Discharge 3ee492-fed7-46a7-a278-e7f405594140

To Whom It May Concern,

This is in response to the unpermitted discharge at the City of Nashville WWTP EQ Basin that started on Friday May 12, 2023 and ended on Sunday May 21, 2023. The unpermitted discharge was due to infiltration that was caused by 3.00 inches of rainfall on May 10-11, 2023. The overflow was heavy at first then turned to a very slow flow. During this time due to the storms both pumps went out in the aeration lift and all of the water had to be bypassed to the EQ Basin until a bypass pump was set up. There was no evidence of Adverse Health or environmental impact. To prevent this from happening again, the Nashville WWTP will try to keep at least 24 are more inches of free board on the EQ basin.

Sincerely,

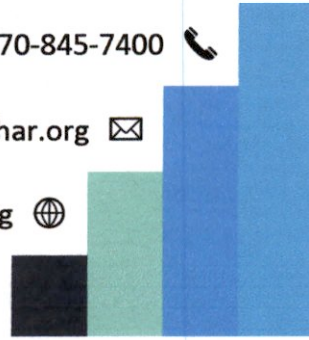

Larry Dunaway  
Mayor  
City of Nashville
