

CONSENT ADMINISTRATIVE ORDER

QUARTERLY REPORT 3

MONTICELLO WASTEWATER TREATMENT PLANT-EAST

NPDES Permit Number AR0021831 AFIN: 22-00379

City of Monticello

Monticello, AR 71639

October 9, 2020

Pursuant to the amended consent administrative order, CAO LIS 18-066-001, the city of Monticello (City) is required to submit quarterly reports. This status report is for the quarter period that ended September 30, 2020.

The hydrograph control release (HCR) system, which includes HCR cell, effluent discharge component and the receiving stream flow monitoring, continues to be performing well. The adequacy of streamflow monitoring with respect to HCR effluent system has been verified and is in good working order.

The city of Monticello has evaluated the contents of the accumulated sludge in the lagoon. The City has already performed preliminary analysis of the sludge in the lagoon and has been presented in the last quarterly report. Based on the preliminary assessments, it was determined to desludge cells 1 and 2 of the lagoon.

The City is ready to bid sludge removal from the lagoon, and would advertise in the coming week to allow time to acquire biosolids land application permit.

Based on the CAP dated August 30, 2019 that accompanied CAO LIS 18-066-001, the City has completed the following:

- Verification of adequacy of streamflow monitoring system with respect to HCR effluent discharge
- Emergency power supply to lift stations

The remaining items are removal of sludge from the pond and minimization of short circuiting in the lagoon system.
