**Subject:** Hauled Waste

As per our conversation this morning, this is notification of hauled waste from Crittenden County landfill to the West Memphis treatment plant. The amount leachate hauled per month is between 100,000 thousand to 200,000 gallons. I receive the reports on the leachate as the landfill generates the reports. I hope this satisfies Part III Section D, 1 Planned Changes of our permit. Our permit number is AR002239. Any changes in the hauling of this leachate I will notify you.
