RE: Certification of Local Limits based on Current Water Criteria

Dear Mr. Gray

We certify that a technical evaluation has demonstrated that the existing technically based local limits (TBLL) are based on current state water quality standards and site specific data are adequate to prevent pass through of pollutants, inhibition of or interference with the treatment facility, worker health and safety problems, and sludge contamination. We accept the MAIL's, MAHL's and WQ levels calculated for us by ADEQ personal and agree that local limits are not necessary at this time.

Thank You
