Good morning Alan,

Attached is a letter detailing a modification to the biosolids operation PLWC anticipates to commence within the next few months. Do not hesitate to contact me if you foresee any issues with the proposed change or require additional information.

Thank you and have a great weekend.

RE: Biosolids Process for NPDES Permit AR0033766

Dear Mr. Anderson:

Paragould Light, Water and Cable (PLWC) is preparing to terminate the biosolids drying process and begin temporarily hauling thickened biosolids to the landfill for disposal. Over the next one to two years, PLWC will conduct a study to determine an alternative method for processing biosolids which is more reliable and dependable than the current drying process. PLWC wanted to notify the Arkansas Department of Environmental Quality of the change in the method of operation. Please let PLWC know if additional notifications are required due to the change in the biosolids process.

If you have questions or need additional information, please do not hesitate to contact Lisa Ellington by phone at (870) 239-7795 or by email at lellington@paragould.com. Thank you.

Sincerely,

A handwritten signature in black ink that reads "Darrell Phillips".
