Re: NPDES Permit AR0033766

To Whom It May Concern:

As required by Part II of the above referenced permit, Paragould Light, Water and Cable (PLWC) has performed a technical evaluation demonstrating that the existing technically based maximum headworks loadings (MAHL) are based on current state water quality standards.

Based on current MAHLs, no local limits are necessary to protect current water quality standards. Therefore, we certify that the existing MAHLs in the Pretreatment Program are based on current water quality standards and are adequate to prevent pass through of pollutants, inhibition of or interference with the treatment facility, and sludge contamination.

If you have questions or need additional information, please contact Lisa Ellington at (870) 239-7795 or lellington@paragould.com. Thank you.

Sincerely,

Darrell Phillips
General Manager / CEO
