RE: Warning on Effluent Violations and Request for CAP
AFIN: 21-00045
NPDES Permit No.: AR0033987
Dumas WWTP – City of Dumas, Arkansas

Dear Gavin:

As a follow-up to our letter dated February 23, 2018, McClelland Consulting Engineers (MCE) is now addressing the above reference matter on the behalf of the city of Dumas (City).

MCE has evaluated the violations and other related issues to develop the milestones. Attached are the milestones for the corrective action plan (CAP). We anticipate resolving the violations by December 31, 2018. It should be noted, if the solutions to the violations would require permit modification, then additional time may be required contingent upon the permitting requirements of ADEQ.

In the interim, the City will continue to exercise caution and good operating skills to minimize excursions of the permit limits, and potentially reduce any significant negative effects on the receiving stream.

MCE will provide quarterly progress reports until the facility meets the terms and conditions of its NPDES Permit. We look forward to working with you in this endeavor.

McClelland Consulting Engineers

Chid H. Kwelle, Ph.D., P.E.
