RE: Notification of Planned System Bypass – City of Harrison Permit No. AR0034321

Dear Lindsay;

The City of Harrison Wastewater Treatment Plant is planning a system shutdown for Wednesday, March 6, 2013 beginning at 10:00am. The shutdown is unavoidable and necessary for the electrical contractor to tie in the new sludge aeration system approved in Construction Permit AR0034321C. The electrical contractor estimates that they should be able to complete all the electrical connections within 4 hours.

The plant will be discharging during this shutdown period. A portable generator will be utilized to keep the UV disinfection system operational during the shutdown. Plant laboratory personnel will collect an effluent sample during the shutdown period and analyze the sample for existing permit parameters.

If you have any questions or require any additional information, please feel free to contact me at 870-741-5527 or Kathryn.catlin@cityofharrison.com.

Sincerely,

Kathryn Catlin
Wastewater Systems Manager
