Subject: 2020024 - Mena WWTP - Unanticipated Bypass

Ms. Graham,

The City of Mena is currently in the middle of an unanticipated bypass at their WWTP due to the high volume of inflow and infiltration being conveyed by their collection system from recent rain events. The bypass began at 8:30 A.M. this morning and they will collect samples. We will provide a follow-up to this email with a formal notification once the final volume can be estimated. Copies of the laboratory test results will also be provided to DEQ.

Please let me know if you have any questions or need any additional information.

Thanks,

Wes LeMonier, P.E.
