**Flag Status:** Flagged

Mr. Anderson:

With the rain storms of 3/27/18, we began overflowing 3/28/18 at 2:48 AM and continued until 7:48 AM 3/28/18 . We estimate 1.5 MG spilled over our walls of the equalization basin. We took samples every 500,000 gallons and are analyzing those in our lab.

Please accept this email as notification of our overflow event. If you would like any more information or have further directions for us, please call or email.

Sincerely,

Todd Beaver, P.E.  
Plant Manager
