Subject: RE: Overdue Progress Report - Magnolia

Kristen,

Please accept this email for the below referenced Progress Report.

We received your message regarding the unacceptable CAP. The revised CAP is attached. The tasks identified in the revised CAP include completion of the ongoing SSES and repair of the pond levee. The SSES is near completion. The final smoke testing will be completed in August, weather permitting. The Utility has secured a quote from an independent Contractor to repair the pond levee. Once a Notice to Proceed has been issued, this work should be completed this summer during dry conditions.
