We would like to offer for consideration, the following Corrective Actions Plan (CAP) for the ADC to correct the ongoing violations and achieve the compliance with the terms of the Permit. The Plan is a phased approach and will lead ADC to the most cost efficient method of resolving their issues.

4. MCE/ADC will review the current chemicals used in their facilities.
5. MCE will report on findings, Items 2-4.

The anticipated completion dates can be modified depending availability funding and material to the site.
