Re: City of Clinton (AR0048836) MMP & Cd Limits Progress Reports

Dear Mr. Gray,

On behalf of the City of Clinton, I am submitting this second annual progress report for the Mercury Minimization Plan and the Cadmium Limits, as required by the City's NPDES Permit (AR0048836).

The City is currently working with consultants to design a sampling and analysis plan for Mercury and Cadmium. Once complete this plan will be submitted to ADEQ. The City has no known industrial users that contribute Cadmium to the collection system, and other than Dental/Medical, no other known industrial users that contribute Mercury to the collection system. The sampling plan will assist in determining the background levels for these metals, as well, as narrow the focus for potential leachate sources from Infiltration/Inflow.

The sampling plan is expected to be completed by August 2021, with the sampling to begin late Summer/early Fall.

Should you have any questions or require additional information, please contact me at the email address or number below.

Sincerely,

C. Kyle Breckenridge, P.E., BCEE
