RE: Final Effluent Limitations for Total Recoverable Cadmium

Mr. Gray:

The Clinton Water and Sewer Department has been in contact with ESC, Inc. They were doing limited testing due to COVID-19. Ned Ryerson contacted the office today. They are ready to start testing for the source of the Cadmium into our Wastewater System to help us meet the Final Effluent Limitation for Total Recoverable Cadmium. The Sewer Operator and I are making a list of customers and locations to be tested as a possible source of the cadmium. Once, we finish the list; we are going to notify Ned Ryerson with ESC, Inc. He will set up times to get the samples and do the testing. We are hoping that once we get the test results back from ESC, Inc.; it will help us to determine the source of the cadmium.

If the above test results do not provide us with the source of the cadmium, then we are going to try to do more tests to determine other sources or if the source of the cadmium is due to infiltration from runoffs.

If you have any questions or need any further information, please contact me at 501-745-4320.

Sincerely,

Jackie William Hinchey, Jr., Manager  
Clinton Water and Sewer Department
