RE: WVE Property Owners Association, Inc.
AFIN 60-02318; NPDES Permit AR0050393

Dear Sir or Madam:

National Pollutant Discharge Elimination System (NPDES) permit AR0050393 for WVE Property Owners Association, Inc. (WVE) was renewed and became effective on March 1, 2017. Part II, Condition No. 5 of the renewed permit required submittal of a plan for compliance with new Total Residual Chlorine (TRC) limits. The plan should include development of and an implementation schedule for Best Management Practices (BMPs) to reduce TRC in the effluent to non-toxic levels. WVE is submitting this document as fulfillment of this permit requirement.

In order to reduce TRC in effluent, WVE will evaluate the use of lower dosage chlorine tabs. The evaluation will attempt to determine the lowest chlorine dosage that is consistently effective for disinfection of the effluent. If necessary, a dechlorination tablet feeder will be added to the contact chamber to remove excess TRC prior to discharge. Implementation of these BMPs is anticipated within 60 days of this letter.

Should you have any questions or require additional information, please contact Shirley Davis at (501) 221-1888.

Sincerely,

Rick Ferguson
