RE: Industrial Stormwater General Permit, Glad Manufacturing Company, Rogers, AR
(Permit Tracking No. **ARR00A175** - AFIN **04-00100**)

Dear Mr. Clive:

The Department is in receipt of the renewal Notice of Intent (NOI) for coverage under the Industrial Stormwater General Permit (IGP) ARR000000 for Glad Manufacturing Company. The NOI was received on 03/26/2010. For tracking purposes, the facility will remain under permit tracking number, ARR00A175. Please continue to use this number in all future correspondence related to this facility.

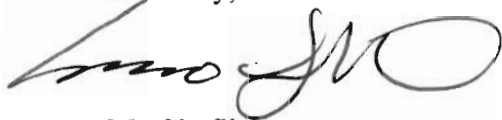

On July 29, 2009, the Arkansas Environmental Federation ("AEF") filed a Third Party Request for Commission Review and Adjudicatory Hearing challenging the permit, Docket No. 09-011-P. As a result of that appeal, the 2009 IGP was automatically stayed and not in effect. On March 26, 2010, the Arkansas Pollution Control and Ecology Commission (Commission) granted a modification of the automatic stay in Minute Order No. 10-09. This modification lifted the automatic stay from the 2009 IGP until a final decision on the appeal is issued by the Commission. Under the terms of the Commission's Minute Order lifting the stay, the 2009 IGP immediately became effective, except for those sections that are the subject of the appeal by the Arkansas Environmental Federation. The written decision of the Commission included alternative terms and conditions that applied in the place of the sections that remained stayed. A copy of Commission's Minute Order, including the attachment that lists the sections that remain stayed and the alternative terms and conditions that apply to all dischargers during the pendency of the appeal, and the 2009 IGP can be obtained from the following website: http://www.adeq.state.ar.us/water/branch_permits/general_permits/stormwater/industrial.htm.

Please note that one of the primary issues in the appeal is the authority of ADEQ to issue a general permit. Although ADEQ believes the law unequivocally gives the Director the authority to issue permits, if any facility is concerned about having legal authority to operate in the unlikely event that AEF should prevail in its appeal, facilities covered by the general permit have the option of obtaining an individual NPDES permit from ADEQ for industrial stormwater discharges.

Enclosed is the Notice of Coverage that should be maintained with the facility's records. Discharge Monitoring Report (DMRs) forms and instructions can be downloaded from the above website. All DMRs for the 2009 and 2010 reporting periods are due by January 31, 2011. Please note that DMRs may be submitted prior to that date.

If you have any questions concerning this matter or need additional information, please feel free to contact the General Permits Section at (501) 682-0623 or myself at (501) 682-0616.

Sincerely,

Mo Shafii
Assistant Chief, Water Division
