RE: Approval to Proceed with Implementation of Phase 2
Investigation at the EDC Facility, El Dorado, AR

Dear Ray:

Water Division staff members have completed their review of the Phase I, Groundwater Investigative Report submitted on January 9, 1995, for the El Dorado Chemical Facility, located in Union County, AR. This report was submitted in response to agreements set forth in CAO LIS-95070. The report was delivered to the Department within the required 90 day time frame as stipulated in the CAO.

Based on the Department's review of the Phase I Groundwater Investigation Report, Woodward-Clyde is hereby authorized to immediately proceed with implementation of the Phase 2 groundwater investigation at EDC.

It is requested Woodward-Clyde staff keep the Department informed as to the progress of the on-going investigation and take all necessary steps to follow the investigative process outlined in the Phase I Report.

Feel free to contact me if you have any questions or comments regarding this correspondence at 682-0642.

Sincerely,

Gerald Delavan, P.G.
Senior Geologist
Water Division
