RE: Approval to Proceed with Implementation of Phase I  
Investigation at the EDC Facility, El Dorado, AR

Dear Ray:

Water Division staff members have completed their review of the proposed Phase I, Groundwater Monitoring Plan submitted on September 7, 1995, for the El Dorado Chemical Facility, located in Union County, AR. This plan was submitted in response to agreements set forth in CAO LIS-95070. The plan was delivered to the Department within the required 90 day time frame as stipulated in the CAO.

Based on the Department's review of the information submitted, Woodward-Clyde is hereby authorized to immediately proceed with implementation of this groundwater investigation at EDC.

It is requested Woodward-Clyde staff keep the Department informed as to the progress of the on-going investigation and take all necessary steps to follow the investigative process outlined in the workplan.

Feel free to contact me if you have any questions or comments regarding this correspondence at 682-0642.

Sincerely,

A handwritten signature in cursive script, appearing to read "Gerald Delavan".

Gerald Delavan, P.G.  
Senior Geologist  
Water Division
