Re: Class III Landfill, El Dorado, Arkansas  
Permit No. 177-SR-1 CSN 70-0040  
Waste Stabilization and Landfill Closure

Dear Mr. Carter:

A closure inspection was made of the referenced facility on February 28, 1996. Based upon observations made during the inspection and the Closure Certification Report of December, 1995 by Woodward-Clyde Consultants, waste stabilization and landfill closure have been determined to meet the requirements of Regulation 22 and the Consent Administrative Order. This letter will serve as Department certification of acceptable closure. The two-year post closure period began on February 28, 1996. Post-closure care in accordance with Section 22.1302 of Regulation 22 should be implemented during the two-year post closure period.

Please coordinate groundwater monitoring and corrective measure activities with Jerry Delavan of the Water Division as noted in the Consent Administrative Order.

Thank you for your cooperation in this matter. If you have any questions or if I can be of service, please contact me at 501-682-0607.

Sincerely,

Rodger Payne  
Engineer
