PART IV DEFINITIONS

"Act": The Arkansas Water and Air Pollution Control Act (Act 472 of 1949, as amended).

"Commence Construction": A continuous physical, on-site construction program. Surveying and drawing of plans are part of the design process and do not constitute commencement of construction. Likewise, it is not sufficient to begin erection of auxiliary buildings unless there is clear evidence (through contracts or otherwise) that construction of the entire facility will go forward in a continuous manner (with no interruptions greater than 18 months).

"Confined Animal Operation": Any lot or facility where livestock or fowl have been, are or will be stabled or confined and fed or maintained and where crops, vegetation, forage growth or post-harvest residues are not sustained in the normal growing season over significant portions of the lot or facility.

"Department": The Arkansas Department of Environmental Quality (ADEQ).

"Director": The Director of the Arkansas Department of Environmental Quality or his designated representative.

"Liquid animal waste management system": Any system used for the collection, storage, distribution or disposal of animal waste in liquid form generated by a confined animal operation.

"Site management plan": A plan prepared by the USDA Natural Resources Conservation Service, an Arkansas Natural Resources District water quality technician, or a professional engineer registered in the State of Arkansas which includes a detailed map of the land application site showing all buffer zones, a description of the land use and the crops grown on the site, and a land use agreement if the site is not owned by the permittee.

"Waste management plan": A plan prepared by the USDA Natural Resource Conservation Service, an Arkansas Natural Resources District water quality technician, or a professional engineer registered in the State of Arkansas detailing the management and disposal of liquid wastes generated in a confined animal operation.

"Waters of the State": All streams, lakes, marshes, ponds, watercourses, waterways, wells, springs, irrigation systems, drainage systems, and all other bodies or accumulations of water, surface and underground, natural or artificial, public or private, which are contained within, flow through, or borders upon this state or any portion of this state as defined by the Act:

PLEASE SUBMIT ONLY THE FOLLOWING APPLICATION (Pages 8-10)
DO NOT RETURN THE PROCEDURES (Pages 1-7)
