

Dear Corporations :

(Dairies, eggs, Chickens, Pork - Farming ruined in Min, Wisconsin, Missouri, Arkansas : States I've personally seen ruin family farms because of Corporate farms.

I'm flabbergasted that you can buy 40 acres (or even less) and create more sewage than the city of Harrison with no septa system, which is having ill effects on the Buffalo already, with many more to come if they were allowed to.

Imagine if the Buffalo were ruined to supply pork to China. <sup>Profits to Buffet</sup> They get meat, we get \$...

If the Buffalo was closed to swimming, etc. at the Little Buffalo confluence, there would only be floating from Ponca to Pruitt which can be used for a total of 2 or 3 months.

That's a 2 day trip on a 10-14 day trip river.
