**Subject:** DO NOT APPROVE Permit #3540-WR-7; AFIN51-00020  
**Date:** Friday, April 08, 2016 9:37:23 AM

---

As landowners and permanent residents of Newton County, Arkansas, living and working on a half mile stretch of the Little Buffalo River in Murray Valley, we would like to express our opposition of issuing the permit modifications for the C&H Hog Farm Waste application.

We do not trust that DEQ can adequately monitor the pollution caused by this waste application as already seen in the Mt Judea and Big Creek.

Big Creek is already showing signs of impairment due to low dissolved oxygen and high E. coli which is definitely impacting the Buffalo River - OUR NATIONAL RIVER.

How long before we can expect the same for the Little Buffalo? We live on the Little Buffalo. We would be directly affected.

DO NOT APPROVE permit #3540-WR-7; AFIN51-00020 application.

Sincerely,

Nancy and Harrison Miner
