Re Permit 3540-WR-7

As a life long resident on Arkansas, with 25 years spent living in Newton County along the Little Buffalo River and Hurricane Creek, I am strongly against the proposal for large volumes of swine waste to be spread over the designated fields.

The runoff from this volume of waste would certainly end up in the Little Buffalo and Hurricane Creek.. then would flow into the Buffalo National River and Big Piney. The quality of water in these streams should not be subject to this impairment, and the majority of residents living either downhill or downstream are opposed to the granting of this permit.

For good reason. Because ADEQ cannot guarantee residents that their swimming holes, fishing places, drinking wells and springs will not have runoff from these fields.

This is the worst idea since the General Permit was originally issued to C&H. Please do not grant this permit modification. The Little Buffalo river and Hurricane Creek are irreplaceable.

Sincerely,

Shawn Porter
