Sarah,

I have reviewed the referenced facility information for 4811-WR-4. Over the past 5 years the facility has had 12 effluent violations for fecal coliform, 18 effluent violations for TSS and 10 effluent violations for CBOD. Over the last 3 years, the facility has had 2 effluent violations for fecal coliform, 11 effluent violations for TSS and 4 effluent violations for CBOD. Based on this information, I am issuing a corrective action letter requesting a milestone schedule for timeline to come into compliance.

Subject: renewal

Can you send me another email in that 4811-WR-4 chain that it is ok to go ahead with the renewal?
