Kathy,

I have a couple of questions to keep our records consistent.

Our database shows the following information for Permittee/Legal Name and Facility Name respectively:

**Benton County, Arkansas Suburban Sewer District No. 1
Villages of Cross Creek**

The renewal application submitted for this permit has slightly different information listed:
Permittee: Benton County, Arkansas Suburban Sewer District No 1 Villages of Cross Creek
Facility: Villages of Cross Creek Apartments

Please submit an application with the correct Permittee and Facility names, or submit a permit transfer/facility name change form to update the names.

Additionally, I will need an updated Disclosure Statement for this Permittee (the name must match the updated application or the name on the transfer form, whichever you will be submitting). This is available on our website; let me know if you would like me to send you a link to this document.

Finally, once I have received the updated Application (or transfer form) with the correct permittee legal name and facility name, as well as the disclosure statement, I can deem the application as administratively complete and run the application public notice. However, some work has been done to the system in response to enforcement action for not meeting the permit limits. An updated Waste Management Plan that includes details of the work done to the system must be submitted before a Draft Permit will be public noticed.

Thank you,
Sarah Cousins
