Katherine,

Before getting the WMP stamped by a PE, he requested that I make some slight alterations prior to submission. The major change was the removal of Appendix D – Loading Rates; this appendix and all references to it were removed. This change will make the void the previous edition submitted by myself to you on 12/19/2017. Additionally, I have included a letter stating that we would like to wait to put Treatment Plant 1 back online until the City is properly equipped with the necessary staff to do so (***See Attached***).

I shared the newly updated and signed WMP via Dropbox. You should get an email with a shared link to the Dropbox folder (may be in junk mail). This method is much easier, for both of us I would presume, as I do not have to send it in parts and you should be able to pull the file out directly and save it as you wish without reassembling it.

Please let me know if you have any questions or concerns.

Thanks

**Barret R. Knutson, E.I.**

Barrett,

The easiest way, if possible, is to split the document and email it in parts. I think we might be able to get it from Dropbox as well, but I am not sure.

Thanks,  
Katherine McWilliams

**Subject:** Cave Springs Waste Management Plan

Katherine,

I am still waiting to get the plan certified from a Professional Engineer. I wanted to get the report to you ASAP as I wait for certification. The file size, with all appendices is 30MB, it is my understanding that the ADEQ cannot receive anything above 10MB do you have a different preferred method for file transferring? Possibly Dropbox or Google Dox.

In the meantime I have attached the narrative (Please see attached PDF). I know that you all already have certain items that I have included in the appendix, such as the engineering drawings, deed, and ADH approval. Please let me know whether it is necessary to send in some of these items that the ADEQ already has on file, as this could drastically reduce the file size and make submission easier.

Feel free to call me with any questions or concerns. If you are not able to reach me at the office, feel free to try me on my cell phone.

Respectfully,

**Barret R. Knutson, E.I.**

RE: Treatment Plant 1 Delayed Timeframe to be Back Online;  
Permit No.: 4893-WR-3

Dear Katherine,

McClelland Consulting Engineers, Inc. on behalf of the City of Cave Springs would like to make the ADEQ aware of the intentions to put Treatment Plant 1 back online. Previously MCE was working with the City to try to make Treatment Plant 1 fully functional and include it into the upcoming No-Discharge Permit 4893-WR-3. Unfortunately, due to extenuating circumstances, this is going to take longer than originally thought despite efforts from the MCE and the City. We are therefore aware of the fact that a permit modification will be needed when Treatment Plant 1 is ready to be put back online.

A new Waste Management Plan, developed by MCE, has been submitted to the ADEQ. The new plan contains the most up-to-date information on the system and its connections and has also been stamped and signed by the P.E. The plan contains limited information of Treatment Plant 1 due to the fact that it will not be part of the current system and upcoming permit renewal.

Please contact me at your earliest convenience if you have any questions or concerns in regards to this letter.

Respectfully,

Barret Knutson, E.I.
