This is a redraft. We missed some conditions in the original that weren't realized until after it was finalized so could you please create the next permit number?

Thanks!

Sorry it took me so long. Some comments on the draft. Plus, ask Amy to create the next permit number for this permit mod.

Thanks,

Redrafted the subdivision that is drip and not septic. Couldn't remember if I should leave the permit number the same since we're going straight to draft PN or change it to the next in sequence so I left it the same for now. Let me know if it should be changed.

Also, I extended the due date because of the holiday ☺

Thanks!
