I am writing to comment favorably on a family farm operation in Mt. Judea, Arkansas, C & H Hog Farm, operated by Jason and Tana Henson.

Their farming operations have been studied extensively. Their farm consistently meets, and often exceeds, both EPA and state environmental standards. It has not been found to have any negative impact on the environment there. I am confident the Henson family will continue to be good stewards of the environment with the precedent they have set.

With this family's conscientious attention to their environment, and their proven commitment to their community, there is no reason to prevent ADEQ from issuing a liquid animal waste permit.

Thank you for your attention in this matter.

Sincerely,

Allison Croslow
