Dear Sirs,

I am a land owner on the upper section of the Little Buffalo River. I am very concerned about the condition of the waters of our county. I have enjoyed their pristine nature for the 38 years I have lived here.

However, I am not concerned only for myself but for the many tourists who visit this part of our Natural State. I am also concerned for the future generations...including your children and grandchildren.

I do not think the Hog Farm should ever have been approved in the first place in the location where it is or even in this county. And I DEFINITELY do not think we should go forward from bad to worse by allowing massive amounts of Hog waste to be dumped on fields where it will run off into our many waterways.

We are one of the few places on the planet left with such clear waters. Please think long and hard about how you can do your part to help preserve them.

Thank you for your consideration.

Kind regards,

Ann Lasater
