I am sure the many scientific reasons why a hog farm being present in the Buffalo River National Park area is a detriment to man and animals have all been pointed out to you. I am sure you are aware of the horror stories in the Carolinas after the fact. I am sure you want opportunities for Arkansas to entice industry here.

All of that can get very complicated to balance, so, in my mind, I like to reduce problems to their most basic premise: **why would we risk one of Arkansas's most valuable assets in terms of money and aesthetics to the profits of so few, both inside and outside of the state?**

Do not allow the legacy of our present governor and ADEQ staff to be the soiling of our beloved state.

Thank you for the opportunity to allow me a say.
