I am among thousands who have not commented on your incredibly dishonest permitting of the hog farm at Mount Judea. It is so hard to believe that you would do this illegal act. I hope many more will use this extended time to comment, but we have no way to know if you even read what we say, or count the comments accurately.

Like most government agencies, you have absolute power, and no reason to change your decision when it is the wrong one.

I have been a Scoutmaster and leader for over 50 years, and have brought generations of Boy Scouts to canoe on the Buffalo River, and camp at Camp Orr. Did you even think of them, and the harm you are doing to this beautiful river? Once the damage is done, there will be no remedy. Why are you waiting to stop this mess until pollution occurs that cannot be remedied? It may not be too late now, but it will be one day.

I seriously doubt anyone will even read this letter. No one likes to admit they have made a mistake, but you have, a huge one. Please be honest with us, and with yourselves, and change this travesty before it is too late.

Bob Gillson
