Questions Comments:

I respectfully request that the new permit for the C&H Hog Farm in Mt. Judea be denied and the previous permits be revoked. The existence of this CAFO places the livelihood of hundreds of local and regional people in jeopardy by threatening the longstanding tourism industry. Perhaps more importantly, it threatens the quality of water which means life to thousands of species in the region, humans included. This CAFO places the presumed rights of a few people over that of the multitude. The waste management system is not designed to protect the karst landscape of the region and put an entire ecosystem in peril.
