Ms. McWilliams,

I appreciate your time to respond - it seems that, regretfully, I did not understand the time frame.

Thank you,

Elizabeth

Ms. Scott,

The permit was public noticed on February 15, 2017 for 30 days, ending on March 17, 2017, in accordance with APC&EC Regulation No. 8. The Department received several requests for a twenty-day extension. In accordance with APC&EC Regulation No. 8.208(C), the Director of the Arkansas Department of Environmental Quality (ADEQ) granted a twenty (20) days extension which ended the comment period on April 6, 2017.

Thanks,
Thanks,
Katherine McWilliams

My understanding was that the public comment deadline was extended to April 20, as per the request letter I read from BWA's lawyer and ADEQ's subsequent approval of the date extension. Could you please confirm that that extension was not approved if that is the case? I am sure that I read an ADEQ reply expressing an approval of the extension to that date.

Thank you.

Ms. McWilliams,

I would like to add my comments about the current issue of a new permit for C & H farm on the Buffalo River. I was very concerned with the granting of the initial permit for this farm without proper review of the situation or adequate notification to the public. In light of that situation, I appreciate the ADEQ's agreement to extend the public comment period and to give adequate notice to us as Arkansas residents about this upcoming decision.

The new studies that have recently come out bring even further to light the need for ADEQ to seek additional investigation, independent investigation in conjunction with its own studies, to answer some more of the questions surrounding waste, karst, algae, nitrate, impacts on residents living nearby (most critically school children), potential leakage during storm runoff, and the possibility of failure of the manure ponds.

I am requesting to you that this new permit not be granted and that a moratorium be placed to prevent any more farms in these sensitive areas.

Respectfully,

Elizabeth Scott
