Subject: [BULK] Permit for hog farm
Date: Friday, March 17, 2017 4:02:03 PM

This email is being written to strongly encourage the Department of Environmental Quality to deny the hog farm a permit (Regulation 5). This hog farm is a definite threat to the water quality of the Buffalo River. Besides being a national and state treasure for us to enjoy, the Buffalo River brings in millions of dollars every year in tourist revenue which supports 582 jobs.

It is not a matter of if the hog waste from this farm will pollute the waters of the Buffalo, but when this will happen. Some studies indicate the water quality is already being affected.

Please vote "NO" on this permit from the hog farm. Your children and grandchildren will thank you.

Sincerely,

Gloria Williams Tran
