Governor and ADEQ,

Please deny the permit for the hog farm in the Buffalo River watershed.

The Buffalo River watershed can't sustain a factory farm on twenty acres when the waste disposal plan depends on spreading untreated hog waste throughout the area. It's a bad business plan.

Congressman Hammerschmidt didn't have to oppose dam construction on the Buffalo River, but he did, and he did it when he was a freshman in Congress. It took political courage to oppose some very powerful supporters of dam construction on the Buffalo River. His decision made a difference. Yours can too.

Very sincerely,

Greg Van Horn
