Greetings,

I have many concerns about the C&H Hog Farm draft permit 5264-W. I will address the one most important to me, that this facility sits on karst, documented by ERI studies done by Dr Tod Hallihan, along with other geologists. I don't want Arkansas polluted, the Buffalo River in particular, the way coal companies polluted Appalachia.

A full Environmental Impact Study rather than a FONSI is called for. There is too big a risk involved in the watershed of the Buffalo National River and this permit should be denied. I employ you to protect the Buffalo River, to do due diligence, and safeguard our state and its natural beauty.

Thank you,

Judith Blazer
