To Whom It May Concern:

As a biologist who has studied ecology and water quality, I am alarmed that a hog farm is being granted a permit to be so close to the Buffalo River. I am sure you are aware that this means approximately 3 million gallons of hog waste will enter the Buffalo River watershed each year. The Buffalo River and the natural beauty of the area, which attract many tourists, will be decimated by this, not to mention public safety concerns. I sincerely hope you will reconsider destroying your state.

Yours,

J.K. Parsons, M.S.
