Please do not allow the ADEQ give C&H A reg. 5 permit. I am respectfully requesting that you protect The Buffalo River Watershed from pollution so that the Buffalo National River, the first National River in the United States, can be enjoyed for generations to come. The Buffalo River is enjoyed by so many and is a destination for people from all over the world to fish, float and supports so many clean tourism businesses . Please do not allow our Beautiful Treasure that is the Buffalo River become a dead, polluted waterway.

Respectfully
Julie Shelton
Eureka Springs, AR
