Date: Saturday, March 04, 2017 7:18:16 AM

Dear Sirs/Madams;

It is heartbreaking to see this extreme source of pollution legally transmitting its poison through the underlying karst soil into the Buffalo National River every day and being helpless to stop the spread of the environmental damage to our mother earth.

It would be like knowing an easily curable cancer was growing inside your own biological mother and being told you were not allowed to do anything to stop it.

It is a sad day indeed that corporate drive to produce stockholder profits anywhere, and at any cost, is aided and abetted by our government at the expense of our environment and the rights of the citizens.

Sincerely,
Jack Stone
