Subject: Support for C&H Hog Farm
Date: Wednesday, April 05, 2017 9:42:33 PM

Please allow C&H Hog Farm to continue their operations in the way they see fit. The right to choose a career & chase your dreams is a freedom we are all due in this country. I believe this family is genuinely doing their very best to manage their farm in a manner that is very cognizant of the effects they might have on their environment & watershed. Knowing they are from that area, the local ecosystem I'm sure is something they will do their best to maintain & protect.

Being a farmer myself, on an Arkansas Century Farm, I have done my best to operate in a manner to preserve & protect the natural resources my farm is blessed with. The C&H Family Farm appears to me to be of a similar mindset.

Continue to monitor the streams in their area, and if a problem is discovered then do what needs to be done to correct it. But please don't punish this family operation by considering them guilty before it's been proven by sound science. They have a right to live & work in this community as much as anyone else

Thank you for your consideration,
John Hamilton
Searcy, Arkansas
