Subject: Buffalo River Hog Farm

Dear Mr. Moery,

Thank you for reading this email.

We live in a state with so much natural beauty and ecological diversity. There is no other place quite like the Ozarks. We are stewards of a holy place where we are charged with keeping safe something rare, sensitive, and truly significant.

I am aware also that we live in a state with economic challenges where investment and productivity are needed and appreciated for the common good of us all.

I pray for the Governors wisdom in making an informed decision regarding the permitting of intensive animal agriculture within the watershed of our Buffalo River.

May the long term benefits of conservative and careful environmental stewardship be seen by our leader as the best common good rather than embracing the short term benefits of permitting a risky and potentially harmful industrial agriculture operation to exist in such a rare, sensitive, and significant place.

Thank you for your consideration of this letter and may God continue to bless this wonderful state and our Governor.

Respectfully,

KRF
