Dear ADEQ,

I am an Arkansas resident who is writing you to let you know that the C&H hog facility should be denied a regulation 5 permit. Such a large operation should never have been placed so near Arkansas' the Buffalo National River. This operation is being conducted on on KARST TOPOGRAPHY. I don't understand how ADEQ can allow this continue with the risk so great.

I would greatly appreciate it if you would stand up to this travesty and stop the regulation 5 permit which requires far less monitoring and reporting from going forward.

Thank you.

Kristin Jones
