---

I am writing to voice my opposition to the C&H Hog Farm permit. It was improperly approved by the Dept of Environmental Quality and should be denied.

There are also health concerns at play here. Exposure to hog waste increases the incidence of asthma as just one example. Children are most vulnerable. And yet waste from C&H is spread in close proximity to a school.

Why would anyone want to pollute such a beautiful river and destroy her beauty for generations to come? Why would anyone want to ruin this tourist attraction which would mean loss of tourist income for our state?

So many good reasons to deny this permit!
