---

Please reconsider allowing hog farms so near the Buffalo River as this action has very little local economic gain and proves disastrous to the health of the river, a source of pride not only for Ar but also a viable means of sustained economic growth through Eco tourism and the like.

I am a concerned citizen, registered voter and tax payer and mother of four children, as well as a home and land owner in Newton Co, Ar.

I am gravely concerned for the health of the river and the health of my children's future.

Thank you for considering these comments.
