---

I urge you to deny the regulation 5 permit for the C & H Hog Farm in Newton County on the watershed for the beautiful and irreplaceable Buffalo National River.

The permit should be denied due to lack of compliance with the Agricultural Waste Management Field Handbook (AWMFH). Numerous issues in waste management include the presence of karst geology, excess waste distribution, failure to develop an emergency plan, failure to comply with standards on flood prone and sloping fields, failure to plan for proximity to sensitive area.

It is critical that the Buffalo National River be protected. It is the responsibility of the ADEQ and governor to act in a responsible manner and deny this permit.
