Dear Ms. McWilliams and ADEQ Board:

We are writing to ask that you deny the request for a Regulation 5 Permit for the C&H Farm in Newton County. This permit reduces the scrutiny of this large CAFO operating in the environmentally sensitive area of the Buffalo National River and allows more waste to be spread on additional fields. It does not adequately protect the River or its watershed which lie within the thin-soiled, porous, karst-riddled area of the Ozarks. Please help prevent further degradation of this national treasure by denying this inappropriate permit.

Sincerely,
Pam and Larkin Floyd
