Dear Katherine McWilliams,

With waterways being impaired nation wide by concentrated animal feeding operations, how can you guarantee that C&H hog facility will not damage the Buffalo River?

Will you allow C&H to continue expanding acreage if it's current disposal acreage, tests above optimum for nutrients?

Future generations are going to wonder even more than we citizens today...how can DEQ not require a more accurate EA?

Neil Compton must be spinning in his grave.

WasteReductionResources.com

Recycling is not THE solution,

We, the consumers, are.
