---

To Whom It May Concern,

Please do not grant the C& H Swine Operation permit. The Buffalo River is truly a national treasure as the first designated Natural & Scenic River & deserves protection. In the past, I spent many days on the Buffalo & hope to return someday. It would be a huge disappointment to find that it was polluted by run-off from a hog farm. Way worse than my personal feelings is the potentially lasting damage to the water quality and subsequent damage to the ecosystem as well as the economic damage caused by a loss of tourism as the amazing reputation of the Buffalo River is destroyed by warnings of E. coli in the previously pristine water.

Sincerely,

Mary Ann Davidson
