The Buffalo National River watershed must be protected. We don't have the right to ruin this treasure for future generations.

Are you uncertain where you stand on this issue? Stand with your feet in the clear water of these streams, then stand with your feet in the cesspools of the hog farm. Make the right decision now.

The threat from hog farm run off never should have been allowed. There is an immediate danger to the school nearby. Representatives for the people of Arkansas have a historic opportunity to preserve the Buffalo and to disallow large scale hog farming there. It is right and reasonable to listen to the will of your constituents on this matter.

AR citizens will not reelect those who wish to trade away the precious Buffalo River.
